

# Removing the Solenoid Replacement

This guide will help you remove the solenoid from the body of the Smart Parts Ion Paintball Gun.

Written By: Shane Villalpando

## TOOLS:

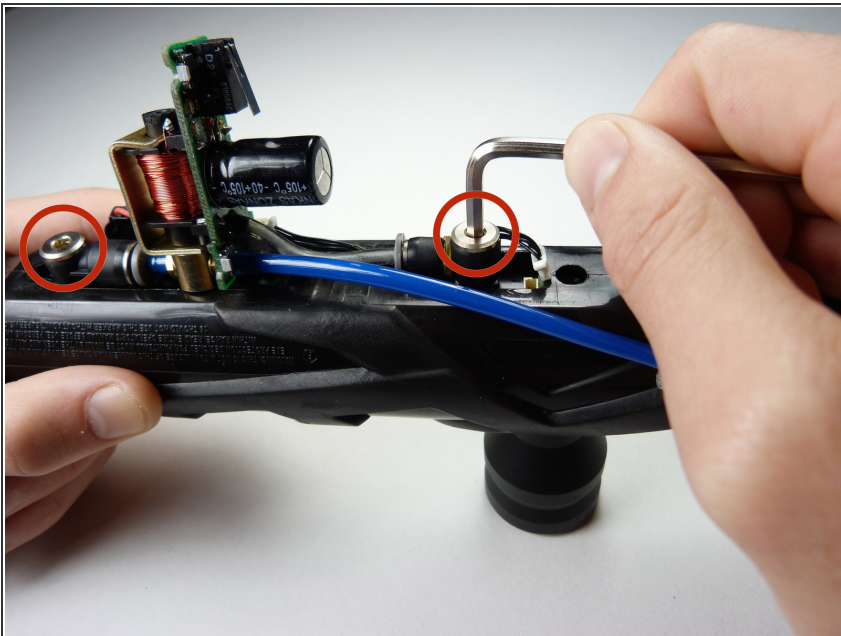

- [Tweezers](#) (1)
  - [3/32" Allen Wrench](#) (1)
-

## Step 1 — Removing the Solenoid from the Body

- Gently use tweezers to detach the white vision wire harness, located directly under the feed tube.
- ① Another small tool or your fingers will work for this.

## Step 2

- Remove the two 1-1/4" screws on either side of the circuit board using a 3/32" allen wrench.

## Step 3

- Separate the solenoid from the gun's body by gently pulling it upwards.

## Step 4

- Slide the metal body out of the plastic shell by holding one in each hand and gently pulling apart.

To reassemble your device, follow these instructions in reverse order.
